Tech passionate, Linux enthusiast

Education

2022–2024 **First Level Master Degree in Cloud Computing for AI and IoT**, *Unito*, Turin

2018–2021 **Bachelor's Degree in Computer Science**, *Unito*, Turin

2013–2018 **High School Linguistic Diploma**, *Liceo Albert*, Lanzo

Research

2024 **Research Thesis**, *Unito - Engineering*, Turin
Zero Trust Network Access for Corporate Solutions

2021 **Research Thesis**, *Unito - SUSE*, Turin
A study of Intel's Speed Shift power management technology

Experience

07/2025–Present **Platform Engineer**, *Recare GmbH*, Remote

- Provisioned AWS production infrastructure via CloudFormation and managed CI/CD pipelines with GitHub Actions across the full SDLC.
- Implemented AWS Cloud Governance (Control Tower, SCPs, Identity Center) and automated user provisioning via SCIM using AWS Lambda, Step Functions, and DynamoDB.
- Designed and managed Kustomize-based Kubernetes infrastructure on AWS EKS Auto Mode, tuning EC2 instance configuration, pod autoscaling, and network hardening to support AI and core workloads.
- Architected a centralized, segmented network infrastructure integrating AWS Transit Gateway, AWS IPAM, and site-to-site VPN connections.
- Owned and executed the end-to-end migration of a 1 TB production database from OTC to the AWS European Sovereign Cloud partition.
- Implemented platform technical controls and evidence collection to meet ISO 27001 and C5 compliance requirements.

06/2024–07/2025 **Cloud Operations & Governance Specialist**, *Engineering Group*, Turin

- Administered 24/7 production Kubernetes clusters and participated in on-call rotations across public administration, banking, and defense environments—managing lifecycles, node scaling, monitoring stacks (Prometheus, Grafana, ELK), and CI/CD pipelines.
- Provisioned and operated bare-metal and managed Kubernetes distributions (EKS, AKS, OpenShift, Rancher) using Terraform, Ansible, and automated GitOps workflows via ArgoCD and Sveltos.
- Engineered bare-metal Kubernetes GPU infrastructure for AI workloads, configuring NVIDIA drivers, CUDA, and the NVIDIA GPU Operator.

06/2022–06/2024 **Infrastructure Engineer - Cloud Specialist (Kubernetes vertical)**, *Cybertech (Engineering)*, Turin

- Maintained and operated enterprise API Management gateways and access control policies for Italian Public Administration, banking, and defense clients.
- Developed Bash scripts to automate routine infrastructure maintenance, service provisioning, and configuration management across cloud environments.

05/2022 **Help Desk**, *Cybertech (Engineering)*, Turin

2019 Web-App for a local writer

Internships

02/2022–04/2022 **Security Specialist**, *Cybertech (Engineering)*, Turin

2019–2020 **Assistant Professor**, *Unito*, Turin
"Programmazione I" course

Projects

All my projects can be found at **my github**.

Skills

Great propensity to team work

Good communication skills

Ability to teach

Aptitude for fast learning

Language

basic french, german

good english

native italian

Computer skills

Cloud AWS, OTC (Open Telekom Cloud), Openstack, Azure, GCP

Backend / Scripting Golang, C, Java/Spring, Bash, PHP, haskell, python, systemtap

Frontend Javascript/Typescript/JQuery/NextJS, HTML, CSS

Database MySQL, PostgreSQL, MongoDB

Tool	Git (GitHub, GitLab, Gitea), Vagrant, Docker, Ansible, Terraform, Jenkins, GitOps (Gitlab CI, GitHub Actions), Kubernetes, OpenShift, Rancher, Helm, Terraform, RabbitMQ
Security	API Manager (WSO2, Axway), Keycloak, SSO (OAuth, OIDC, SAML)
Observability	Grafana, Prometheus, ELK, OpenTelemetry, Datadog
OS	Linux, Unix-like, Windows
Markup	LaTeX, Org, markdown
Misc	Devops culture, Cloud-native, Microservice architecture

Certifications

2022	Microsoft certified: Security, Compliance, and Identity Fundamentals
2022	ApiAcademy: API Product Manager
2022	ApiAcademy: API Designer
2022	ApiAcademy: API Security Architect

"I authorize the processing of my personal data according to Legislative Decree 196/2003 and Regulation of the European Parliament 679/2016 (GDPR)."
